

Procure, forecast, and dispatch fuel with precision.

Do it all with Procurement by Warren Rogers.

Retail owners, logistics personnel, station managers, IT staff, and carriers alike prefer procurement to optimize their fuel stocks. Here's why:

C-Store owners & Travel Centers

- Tank System Volumes and Forecast Run-Out Times are constantly Updated
- Carriers are provided access to Tank Volumes only for stores in their delivery group
- Current procurement info is available by computer, tablet, or mobile phone

Logistics Personnel

- Advanced BI Analytics for Fuel Demand forecasting
- Upsurges in Demand are Reflected in Run-Out Calculations
- Email alerts for Logistics Personnel and Carriers when Designated Run-Out Thresholds are Reached

IT Personnel

- Secure encrypted collection and transmission of tank data into a Cloud Environment
- No Carrier Access to Corporate VPN
- Ability to Change Carrier Assignments and Restrict Access to Company Information.

Fuel Carriers

- App Assigns priorities for Load Planning
- Provides Drivers with Up-to-Date fuel volumes and ullage via Tablet or Mobile phone
- Store Information is always accessible —no need to reach out to Stores for Updated Fuels Data

Store Managers

- Assurance that Store will always have adequate amounts of fuel on all grades
- Minimizes Potential for Spills and Overfills.
- Hands-Off Involvement in Fuel Replenishment Operations

With Procurement you get:

- real-time tank levels, ullage amounts, and consumption forecasts
- intuitive advanced forecasting analysis
- superior accuracy and reliability
- vital inventory alerts
- streamlined user dashboard with enhanced graphics
- automation feature prompts carriers when a delivery is due
- personalized support from expert analysts
- unsurpassed security featuring Warren Rogers' Security Suite

Our procurement application is scalable, so it can grow with you. Get a free quote and ask for a demonstration today.

Fueling your profitability.
